

**who is allah the religion of islam** - *this is because it stems from the arabic verb ta allaha or alaha which means to be worshipped thus in arabic the word allah means the one who deserves all worship this in a nutshell is the pure monotheistic message of islam, who is allah what is the origin of belief in allah* - *allah al ab means god the father and this usage is one way arab christians distinguish themselves from muslims before the inception of islam most arabs were polytheistic pagans believing in an unfeeling powerful fate that could not be controlled or altered or influenced by human beings, who is allah understanding god in islam the conversation* - *allah the divinity at the heart of islam has 99 names and is often poorly understood outside the faith islam recognises no god but allah who revealed scriptures to both jewish and christian, who is allah why islam* - *allah means the one god the main point to be emphasized here is that unfortunately many of the writings that are found in various libraries in the west which are not written from a muslim standpoint or how muslims understand islam depict allah as if he is some type of a tribal arabian god or even the god of muslims*
